WHEEL TECH BULLETIN

All 2017 FORD F-250/F350 SUPER DUTY TRUCKS

The new body style 2017 F-250 and F350 Super Duty trucks are being equipped with both the Sterling 12-bolt and Ford Motor Company's new 14-bolt rear axles.

It is our understanding that Ford Motor Company will be equipping all F-250 and F-350 Super Duty trucks going forward with the new Ford 14-bolt rear axle.

All SOTA Offroad 8x170 wheels fit the Sterling 12-bolt rear axles ok, but they will not work with the new Ford 14-bolt rear axle. Please update your sales team to not sell any 8x170 application wheels from our line-up to 2017 Ford F-250/F350 Super Duty truck owners with the 14-bolt rear axle at this time. SOTA Offroad will provide an update to you and your company when we have resolved the fitment for the 2017 Ford Super Duty 14-bolt rear axle.

Contact us if you have any questions we can answer for you regarding this wheel tech bulletin.
